Ashish Vaghela

Developer Advocate · Java/JVM, Testing & Open Source

Software crafter who builds developer tools and explains them. I maintain an npm package with **5k+ weekly downloads**, speak at Java meetups, write about testing and developer tooling, and help run open source communities. Two years shipping JVM services in production means I can explain tools to developers from real use, not just theory.

OPEN SOURCE & COMMUNITY

Creator & Maintainer — satteri-plugins npm

- Ported remark/rehype plugins to Sätteri, the Rust MDX engine behind Astro; **5k+ weekly downloads**.

Core Contributor — AceUnit & Reqcover

- AceUnit: C unit-test discovery framework. Reqcover: requirements coverage for the JVM.

Maintainer — WeDoTDD.com · Core Team — Open Source Weekend

- Contributor to Zod, MDN Web Docs and Akash Network; Hacktoberfest 2025.

SPEAKING & WRITING

“Jugaad vs JFR: What your open source libraries are really costing you” Sep 2026

Java User Group Gujarat Meetup

- Live JVM benchmarks of Jackson, Hibernate and Lombok costs, measured with Java Flight Recorder; slides and demo repo published.

Technical blog — ashishvaghela.in & dev.to 2024 – Present

- 20 published posts on TDD, JUnit, functional programming, webhooks, developer tooling and Astro.

EXPERIENCE

Software Crafter — Nelkinda Software Craft Sep 2024 – Present · Remote

- **Developer advocacy:** wrote technical blog posts and social content for the product and its community.
- Built **ChatNCharge** (client project) from scratch in Spring Boot: backend, data model and APIs, now serving **1,000+ users**. Validated features with real users; mentored junior developers.
- Owned the Triffuns community platform end to end: architecture, Spring Boot + Thymeleaf with TDD, and a UI redesign driven by user feedback.
- Automated builds and deployments with GitHub Actions and Docker; built a Quarkus service-monitoring tool.

Full Stack Developer Intern — Greycell Labs Jan – Jul 2024 · Ahmedabad

- Ran a data migration that improved query and retrieval performance; optimised profile flows to reduce server load.

PROJECTS

Aether Gateway solo, OSS

- Self-hosted LLM gateway for OpenAI-compatible SDKs: failover, circuit breakers and retries across Ollama, Groq and Gemini.
- pgvector semantic cache: cache-hit latency **8.9 ms p95**.

MindGuard solo, Android

- Privacy-first app that blocks short-form video feeds; no accounts, tracking or servers. Kotlin Multiplatform, Jetpack Compose.

SKILLS

Developer relations

Technical writing · Public speaking · Live demos · Community building · OSS maintenance · Mentoring

Languages & frameworks

Java · Kotlin · JavaScript · Spring Boot · Quarkus · React · Jetpack Compose

Data & infrastructure

PostgreSQL / pgvector · MySQL · MongoDB · Docker · Kubernetes · GitHub Actions · Linux

Practices

TDD · JUnit · Clean code · API design · Remote & async

EDUCATION

MCA — Gujarat University 2022 – 2024

First class

BCA — GLS University 2019 – 2022

Distinction
