linkedin.com/in/ashish-codejourney

Engineer turned community builder. I ship open source developer tools, run meetups for developers in Ahmedabad, mentor first-time contributors, and write and speak about what I build. I work across Java and Kotlin, JavaScript and TypeScript, Android, and self-hosted AI, so I can meet developers where they already are and show them working code, not slides.

5k+	1,000+	3	20
weekly npm downloads, satteri-plugins	users on a product I built from scratch	developer communities I help organise	technical posts and essays published

COMMUNITY

Core Team, Open Source Weekend

- Created and maintain the OSW portal; mentor new open source contributors; organise tech meetups.

Core Team, Ahmedabad Developer Club

- Run the club's meetups and events for developers in Ahmedabad. Volunteer with GDG, Java User Group and The Hackers Meetup.

Maintainer, WeDoTDD.com

- Keep a community directory of teams practising TDD and XP growing, with stories of how they work.

OPEN SOURCE

Creator & Maintainer, satteri-plugins — npm

- Ported remark/rehype plugins to Sätteri, the Rust Markdown engine in Astro 7; **5k+ weekly downloads**.
- Documented three silent Astro integration bugs and a migration table for plugin authors; every port tested against the original's output.

Core Contributor, AceUnit (C) & ReqCover (JVM)

- Also contributed to Zod, MDN Web Docs and Akash Network.

EXPERIENCE

Software Crafter, Nelkinda Software Craft — Sep 2024 to Present · Remote

- **Developer advocacy:** wrote technical blog posts and social content for the product and its community.
- Built **ChatNCharge**, connecting EV drivers with charging stations, from scratch in Spring Boot; now serves **1,000+ users**. Validated features with real users and mentored junior developers.
- Owned the Triffuns community platform end to end, including a UI redesign driven by user feedback.
- Automated builds and deployments with GitHub Actions and Docker; built a Quarkus service-monitoring tool.

Full Stack Developer Intern, Greycell Labs — Jan to Jul 2024 · Ahmedabad

- Ran a data migration that improved query performance; optimised profile flows to cut server load.

SPEAKING

Jugaad vs JFR — Sep 2026

Java User Group Gujarat

- What open source libraries really cost in production, measured live with Java Flight Recorder.

WRITING

ashishvaghela.in & dev.to

- Migration guides, tooling deep dives and testing essays, e.g. the Astro 7 + Sätteri gotchas guide.

PROJECTS

Aether Gateway — OSS

- Self-hosted LLM gateway: failover, circuit breakers and retries across Ollama, Groq and Gemini; pgvector cache at **8.9 ms p95**.

MindGuard — Android

- Privacy-first app that blocks short-form video feeds; no accounts or tracking. Kotlin Multiplatform.

SKILLS

Developer relations

Technical writing · Public speaking · Live demos · Event organising · Mentoring · OSS maintenance

Languages

Java · Kotlin · JavaScript · TypeScript · SQL

Platforms & tools

Spring Boot · Quarkus · React · Astro · Android · PostgreSQL · Docker · Kubernetes · GitHub Actions · LLM APIs

EDUCATION

MCA, Gujarat University — 2024

First class

BCA, GLS University — 2022

Distinction
